Lesson: Water Sampling	1A.S2.1 Teacher Instructions	Nil	<ul style="list-style-type: none"> CD disc or similar per Secchi disc. (CD's will work best with this activity however you can also use plastic from ice cream lids, old paint tin lids, Milo lids etc. You will need to punch a hole in the centre of these) Clipboard Length of string – one metre per student/team Black felt pen – one per student team Paper clips – three per student/team Pliers – one or two pairs as these can be shared Small fishing sinker, washer or similar weight around 40g – one per Secchi disc Three buckets (20 litres is better) Water samples for testing. Tap water with soil or clay added in varying amounts in the three buckets is a good substitute for simulating varying water samples. If there is only sand at your school, it may be necessary to use some red food colouring (which seems to attach itself to suspended particles, and make the water much darker or more turbid).
